

## **ASAP PEST CONTROL**

### **Tenant Preparation For Bed Bug Treatment**

- 1) Tenants should vacuum **ALL** furniture and floor surfaces (carpet & hardwood) After completing this task they should throw away the vacuum bag by taking it out to the dumpster.
- 2) Tenants should remove **ALL** linens from their beds and put in plastic bags along with **ALL** their clothes ( Including those in closet and dresser) and wash in Hot water or dryer for 20 minutes on High heat setting **AFTER** Treatment.
- 3) Tenants will need to remove everything from the perimeter walls of each room throughout unit by 3 feet so we can get those areas to render the necessary inspection / treatment.
- 4) Tenants will need to remove **ALL** animals ( birds,cat, dogs) from the unit during our treatment and remain out of the unit for a period of 3 hours after the treatment has been performed.
- 5) We know it's much to ask, but it is necessary in order to get results. Thank You
